Solution

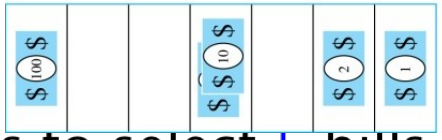

- Some possible ways of placing the five bills:

$|\,|\,|\,{*}{*}\,|\,|\,|\,{*}{*}{*}$

${*}\,|\,{*}\,|\,{*}{*}\,|\,|\,{*}\,|\,|$

${*}\,|\,|\,|\,{*}{*}\,|\,|\,{*}\,|\,{*}$

- # of ways to select 5 bills from 7 denominations = # permutations (with indistinguishable objects) for 6 **Bars** and 5 **Stars**.
- How many different strings of length 11 can be made by reordering 6 **B**s and 5 **S**s? How many bitstrings of length 11 contain 6 1s?
- $C(11,5) = \frac{11!}{5!6!}$
